SPECIFICATIONS	RECIRCULATING PARTS WASHER
Overall Dimensions	30-3/4" x 21-1/4" x35-3/4"
Thank Dimensions	29-7/8" x20-3/4" x10-8/10"
Max Solvent Capacity	20.Gallons
Pump Output Through Hose	50gph
Electrical Requirements	115V/60Hz/0.5A
Gross Weight	34.5kgs

CLEANING SOLUTIONS

Approved cleaning solutions.
Water/household detergents (PH6 –B)

WARNING

The pump of your Parts Washer may be damaged if you use solvents other than those listed above such as methyl ethyl ketone (MEK), Perchloroethylene or trichloroethylene.

TROUBLE SHOOTING

The only trouble you should ever experience with your Parts Washer is reduced volume flow or no flow of cleaning liquid from the flex hose nozzle. The probable cause is foreign matter in the flex hose.

CORRECTIVE PROCEDURE

1. Check that indicator light on switch box is lit.
2. Using an insulated handle screw driver to lightly touch tip of housing of motor. A light oscillation magnetic pull indicates power is reaching the motor.
3. Disconnect power plug, remove flex hose from pump flow – out line.
4. Remove front of pump housing by removing 3 screws. Clear any foreign matter lodged around impeller.
5. Reassemble in reverse order.
